

List of:

LAKE CREEK WATER STORAGE UNITS

Names	FGS	Pict	Hist
-------	-----	------	------

Jay McNaughton Home Pond

Heber City #1 Potable Water Round Cement Tank

Heber City #2 Potable Water Round Cement Tank

George Holmes Private Irrigation Retention Pond

Several (at least three) ^{James} Lindsay Reservoirs

Lake Creek Reservoir

Witt's Lake

NOTE:

Lake Creek Irrigation Company took their water out at Don Clyde's crossing. Because they lost so much water near the Red Ledges, they built an open cement ditch to carry and conserve their water.

Some of Don's sheep would fall into the open cement ditch. So the Irrigation Company had to build a fence on both sides of this open ditch to protect the sheep.

Several years ^{in the spring,} the water came down so fast it tore the open ditch apart requiring replacement.

Finally the Irrigation Company built a cement flume to carry the water.

ANOTHER NOTE:

One day a geologist came to Attorney Levi Montgomery and asked Levi to take him up to the natural lakes in Lake Creek. Levi said I know of none of these.

The geologist said yes, the geology in that area allows for several natural lakes to form from the snow melt and run off.
